

Week 1 - Individual Reflections

- **What do I want to learn or understand better?**

I want to learn how the scrum process works and how to use it to be able to make the project better and more organized. I think that it will be very helpful in the future to know how the scrum process works. I want to learn how to create a project based on a stakeholder and how to adjust the project to fit their needs.

- **How can I help someone else, or the entire team, to learn something new?**

Since we from IT have had two similar projects before, I think that I can learn the students from I how to plan the project and how to use git and Trello. I think that I learned a lot from the last project about user stories and git hub and that my knowledge about it will be helpful for some people in the team. I will try to help people by letting them know that I have experience and to be open for questions and maybe have an introduction to help people get going with the different programs.

- **What is my contribution towards the team's use of Scrum?**

Since I don't really know what scrum is yet makes it hard to answer. Hopefully I will get a better understanding about it next week.

- **What is my contribution towards the team's deliveries?**

We have been working together all the time this week. I have done my best to add what I think is important to the social contract, I have been active during the meetings and I had several ideas for the project.
