

Individual Reflection Week 2

Cecilia Michelsen

What do I want to learn or understand better?

I would like to learn more about how to work in an agile way by working in sprints and with Scrum. I am also looking forward to work in Android Studios and want to learn more about this program. Since the first sprint of the project have not begun yet my thoughts from last week hasn't changed.

How can I help someone else, or the entire team, to learn something new?

With the knowledge in coding from my past courses I will help to develop the app and do my best to contribute to the team's work. Further I will try to develop solutions that creates value for the stakeholder with my knowledge in economics.

What is my contribution towards the team's use of Scrum?

As mentioned the first sprint of the project has not started yet and we haven't begun to work with Scrum. I will continue to learn more about it so I am well prepared with knowledge of how to use Scrum.

What is my contribution towards the team's deliveries?

This week I participated during the meeting in the beginning of the week and was a part of the discussion of how to move forward in the project. I contacted a stakeholder and also prepared a meeting document for project scope. Unfortunately I got very sick for the next meeting so I couldn't contribute to the work for the rest of the week. Looking forwards I will do my best to contribute to the team's deliveries.
