

Individual reflection - Rebecka Jakobsson

What do I want to learn or understand better?

I'm happy with all I've learned during this project. For a future project I would like to learn more about Android Studios and what it would be to use a single scrum master/product owner instead of sharing the responsibility of those roles.

How can I help someone else, or the entire team, to learn something new?

For this upcoming weeks I will be able to help the team by structuring and writing the final team reflection.

What is my contribution towards the team's use of Scrum?

This week I've been the scrum master together with another team member. Thereby we have led the meetings with the group and tried to organize the work and the last sprint reflection. I've also been part of the product owner team and participated in the meeting and demo of the final app with her. Lastly, I've fulfilled my user story together with my coding partner.

What is my contribution towards the team's deliveries?

This week me and my coding partner created the filter function used in the company list. We added methods to enable filtering and made sure it was visible in the app as well.
