

Individual Reflection Week 6

Cecilia Michelsen

What do I want to learn or understand better?

This sprint we talked about unit-testing during the supervision meeting. I want to learn more about this and how to ensure good code quality.

How can I help someone else, or the entire team, to learn something new?

I have learned a lot in Andorid Studios the last four sprints. Since we switch coding partner and user stories every week I can learn my new coding partner about the code I've been working on the past sprints.

What is my contribution towards the team's use of Scrum?

This week I had the role as a Scrum master together with Linnéa. We were responsible for all the meetings and the sprint planning. I was active when planning and choosing user stories for this sprint and wrote tasks and acceptance criteria's with input from the team. Further I had the same roles as last sprint; as a developer of user stories and as a product owner shared with the rest of the team.

What is my contribution towards the team's deliveries?

This week Tina and I worked on a user story which would implement a search function in the listview in CompanyList. We faced some problems when connecting part of the backend with frontend. We tried lots of different solutions, watched tutorials, searched for information and I gained much knowledge when trying to solve the problem. However we finally manage to complete the user story with help from a team member. Furthermore I was responsible for the sprint planning this week, was active during meetings and wrote the team reflection together with the team.
