

Individual reflection week 4 - Norbert Laszlo

What do I want to learn or understand better?

- **A:** This week we didn't do enough research on how to complete a user story and didn't plan the task well enough in the group.
- **B:** To plan better so that we don't end up in the same situation as a group again.
- **A→B:** In the next sprint do more research and plan the tasks for programming pair that is taking on the user story that we failed this week.

How can I help someone else, or the entire team, to learn something new?

- **A:** As said before, because of poor planning of tasks two of the programming pairs couldn't complete their user story.
- **B:** Complete the user stories that we failed that we failed this week in the next sprint.
- **A→B:** Help the team to better plan the tasks for the user story in question and be a helping hand during the development.

What is my contribution towards the team's use of Scrum?

- **A:** We had a poor planning for a user story which difficulty we underestimated.
- **B:** Never underestimate the difficulty for a user story again.
- **A→B:** Write more detailed user stories with better research of the prerequisite knowledge needed to complete them.

What is my contribution towards the team's deliveries?

- **A:** We failed to solve the issue we had this sprint in our mid week standup meeting.
- **B:** Be more engaged in the problems that other programming pairs experience and help them to overcome the issues by coaching. (In our mid week standup meetings).
- **A→B:** Come up with better solutions for problems we experience early on in the week so that we can deliver what we planned to deliver for that particular sprint.
