Week 7 - Individual Reflections

What do I want to learn or understand better?

I want to learn how to reflect and write in the A, B, A->B way. We tried to write in that way, and it felt like we got more out of our reflection. I want to try to adapt that way of thinking into other courses to help my learning process and make it more efficient.

How can I help someone else, or the entire team, to learn something new?

This is our last week and I think we all can learn from each other how to close a project and finish it in a good way. We all have different experiences in that area, and I think we can inspire each other.

What is my contribution towards the team's use of Scrum?

I have been active during our planning meeting and have together with other team member led those meetings forward. I completed my user stories together with Cecilia.

I have been taking notes during both our meeting with our stakeholder, during our meeting with the supervisor and the lecture about the final presentation.

My part of the Scrum board this week was the user story:

> *"5.5 As a user I want to see a logo at company details page to recognize the company"*

> *"5.4 As a user I want to be able to easily see what students a company is looking for and what they offer on the company detail page"*

What is my contribution towards the team's deliveries?

This week I have been collaborating with Cecilia. We solved the user stories that were assigned to us in a good way and I'm very happy about the result! We also wrote our part of the Team reflection together. I think we have been having a good cooperation this week, both within the coding pairs but also in the whole team.
